

Arts & Terroirs is committed to an environmentally responsible policy. Nature has given us a unique heritage. We are committed on a daily basis to preserving our terroirs for future generations.

■ **Water and energy-saving measures:**

- Recycling and exploitation of our waste: from the garden, paper, cardboard, glass, metal, plastic, etc. Our local authority uses an incentive fee system.
- The use of official eco-labels and French NF standards is prioritised
- Using low-energy bulbs
- Regular maintenance of the boiler, material and equipment
- Special flush systems and mixer taps
- Preference is given to local suppliers

A green approach also means reducing the impact of our business on human beings to assure better quality of life for our staff and guests. We take special care to minimise noise pollution and provide our guests with quiet, calm places to sleep, relax or work in complete peace.

■ **Acoustic comfort:**

- Old building with very thick stone walls
- Maximum 6 rooms per corridor
- Rooms and corridors insulated
- All public areas carpeted
- Exterior insulation including double or triple glazing
- Rooms away from reception, the breakfast room and other busy areas such as the wine bar

We choose to use natural temperature control to prevent health risks due to energy-intensive air conditioning and heating.

■ **Temperature control:**

- Automatic in winter depending on outside temperatures
- Daily airing and ventilation
- Trees to give coolness in summer to the rooms on the same side as the garden
- Sun awnings over all windows on the front
